Manufacturing IT Solutions

Yard Management Quick Reference Guide

Yard Management is part of our new line of Manufacturing IT Solutions. Built on proven, world class technology, these solutions offer off-the-shelf functionality designed to target the typical challenges encountered in manufacturing. The technologies are highly scalable, cost effective and can be seamlessly integrated into new or existing processes with great ease.

Our Yard Management Solution allows you to take control of the storage and retrieval of work-in-progress and finished product within the manufacturing facility.

The Technology

Yard Configuration

Configure and display an exact replica of the storage yard

Transaction Control Center

Provides access to all scheduled product movement transactions

Mobile Application

Supports delivery and retrieval operations

Additional Resources
